

BizzSmartz specializes in developing innovative mobile applications to meet the needs of today's on-demand businesses. Over the last few years, BizzSmartz has developed groundbreaking solutions for a number of startups and SMEs worldwide. Our on-demand solutions have the potential to improve traffic flows, integrate multiple revenue-generating sources, and to build a brand that everybody loves.

We have a strong and, experienced team specializing in a range of technologies for providing consultation, ideas and cost effective solutions. Our services and solutions run the entire gamut of what a modern on-demand business could possibly need from the spectrum of technology.

BizzSmartz is a division of Netsmartz LLC global group of companies involved in providing IT solutions and services to businesses across the world.. Since 1999, Netsmartz has been headquartered in Rochester NY and expanded to over 8 global locations with over 1000 team members.

How Bizzsmartz developed a custom application for Loopr, that facilitates hassle free bookings around the city for users to sample local highlights like nightspots, craft brewing, food, cannabis tourism, and more.

THE CLIENTS

Loopr is a Colorado based company that facilitates hassle free bookings around Denver for people to experience local hotspots including nightlife, food, beverage and cannabis lounges.

CHALLENGES

To provide a convenient real-time application for users to reserve transportation to the city hotspots and provide promotional information. Loopr required an admin panel to manage the content and pull data reports for revenue, reservations and event bookings.

SOLUTIONS

Loopr engaged with Bizzsmartz to provide a team that could rapidly develop a platform for their user base. Netsmartz assembled a multi-disciplinary team of eight specialized members including two Mobile Developers, one Backend Developer, a Database Architect, Business Analyst, Graphic Designer, Solution Architect, Quality Analyst and a Project Manager.

RESULTS

The customer can now easily reserve seats before purchasing passes, have the ability to purchase multiple passes, see the city's best attractions, view the transportation routes and review history. The Loopr team received a fully customized admin panel, a navigator/staff app for real time information along the journey and most importantly the application is running smoothly with 24*7 support and maintenance by Bizzsmartz
